

# Seminar on Organic Electronics

ISPM RAS,  
Moscow, Profsoyuzyana 70

February 2, 2011

(Wednesday)

## Program

- |               |   |
|---------------|---|
| 11.00 – 11.30 | Dr. Sergei Ponomarenko (ISPM RAS) “Oligothiophene-based organosilicon materials for organic electronics and photonics”                                |
| 11.30 – 12.00 | Dr. Pavel Troshin (IPCP RAS) “Research activities in the field of organic bulk-heterojunction solar cells at IPCP RAS”                                |
| 12.00 – 12.10 | Coffee break  |
| 12.10 – 12.40 | Prof. Sergei Chvalun (ISPM RAS) “Nanostructured polymeric and hybrid materials synthesized by VDP-process. Electronic and optoelectronic application” |
| 12.40 – 13.00 | Dr. Mikhail Yablokov (ISPM RAS) “Thin polymer films formation by plasma polymerization for optoelectronic applications”                               |
| 13.00 – 13.30 | Discussion  |

**Working language: English**
